## Editorial

The present issue of AETHIOPICA, like the preceding one, is partly monographic, with a section containing the proceedings of the Panel on Islamic Literature in Ethiopia: New Perspectives of Research, from the ‘19<sup>th</sup> International Conference of Ethiopian Studies’, held in Warsaw, Poland, on 24–28 August 2015.

Starting from this issue, the annual bibliography on Ethiopian Semitic and Cushitic linguistics held from its inception in 1998 for eighteen years by Rainer Voigt is handed over, on Voigt’s own will, to a pool of younger scholars, with the substantial support of the AETHIOPICA editorial team. I would like on this occasion to express the deep gratitude of the editorial board of AETHIOPICA and of all scholars in Ethiopian Semitic and Cushitic linguistics to Rainer Voigt for his fundamental and valuable contribution.

MULUKEN ANDUALEM SIFEREW, *Comparative classification of Ge'ez verbs in the three traditional schools of the Ethiopian Orthodox Church*, Semitica et Semitohamitica Berolinensis, 17 (Aachen: Shaker Verlag, 2013). 198 pp. Price: € 48.80. ISBN: 978-3-8440-2348-0.

In present day Ethiopia, Ge'ez is predominantly studied in the *Qəne* schools of the Ethiopian Orthodox Täwahədo Church. Ge'ez served as the official court language for many centuries, but was replaced by Amharic in the thirteenth century; however, until the coming of Amharic literature in the nineteenth century, it remained the written prestige language. Moreover, Ge'ez is still the *lingua sacra* of the Ethiopian Orthodox Täwahədo Church, and serves as a medium of instruction for different ecclesiastical disciplines such as *Qəne* (Ge'ez poetry), *Zema* (Yaredic hymn), *Aqqʷaqʷam* (Yaredic chanting), *Tərgʷame-mäṣahäft* (exegesis of biblical and canonical scriptures) and *Qəddase* (liturgy). Currently, there is a strong tendency within the church to consider the language as a priceless heritage and to protect it accordingly. Therefore the church has an unbroken interest in preserving and expanding Ge'ez studies in many parts of the country.

The work under review deals with the classification of Ge'ez verbs based on the methodologies applied in the *Qəne* schools. It is the result of the author's doctoral research in Semitic Studies at the Freie Universität Berlin, supervised by Prof. Dr. Rainer Voigt and defended in 2013.

For its completion, the author consulted various printed texts and handwritten copies that deal with grammatical issues of Ge'ez, as well as different dictionaries and grammars prepared by local and foreign scholars. In addition to this, the author conducted fieldwork in different places, particularly in Bahər Dar and Addis Abāba. The duration of the fieldwork is not mentioned (pp. 18, 165). The author himself is a *Qəne* scholar and has a strong connection with the tradition of the schools. Thus, his education and experience have genuinely helped him to present extensive explanations and practical details on selected points. The book is an important contribution and helps

scholars to understand the classification of Ge'ez verbs, comparing the traditions and methodologies presented.

The introductory part (pp. 1–18) provides different meanings and explanations about the word Ge'ez and about the main subjects of Ge'ez study in the *Qəne* schools. The three *Qəne* houses Wäšära, Wadla and Gonğ are introduced with some illustrative pictures. A short list of publications on Ge'ez grammar is also included in the introductory part.

The introduction is followed by the following four chapters:

1. Structure of the verb (pp. 19–57);
2. Ge'ez verb classification (pp. 58–100);
3. Conjugation of verbs with semi-vowels (pp. 101–125);
4. Verbs with laryngeals (pp. 126–151).

In the first two chapters that comprise almost half of the entire book, the author offers detailed discussion of the typology and classifications of Ge'ez verbs, comparing different traditions of the schools, pointing out their similarities and dissimilarities on various issues. Sometimes, the differences are expressed numerically; the estimated or the total amount of verbs is given with, from time to time, a thorough presentation of the issue under discussion. Mostly, however, the evidence collected from either the handwritten copies of Ge'ez grammar or the information acquired from his informants are provided in Amharic with its transliteration and an English translation. This kind of presentation might fill a couple of pages with the same readings. However, if it is considered positively, it gives a chance for the reader to evaluate, analyse and compare first-hand information for him- or herself, to draw their own conclusions and to appraise the data provided.

In the same part of the book, the author shows how other grammarians classified the verbs in different ways and from different points of view. According to the author's research findings, all three *Qəne* houses follow different classifications. Wäšära's classification demonstrates eight so-called 'main verb types' (the model verbs in a paradigm) (**ቀተለ** qätälä, **ቍደለ** qäddäsä, **ገበረለ** gäbrä, **አለመለ** a'märä, **በረከለ** baräkä, **ሠይመ** śemä, **በሁለ** bəhlä and **ቆሙ** qomä) and 50 so-called 'sub-type verbs', whereas the Wadla house classifies eight verbs under 'main verb types' (**ቀተለ** qätälä, **ቍደለ** qäddäsä, **በረከለ** baräkä, **ማተረከለ** maṛräkä, **ተንበለ** tänbälä, **ሰሰየለ** sesäyä, **ከከለ** kəhlä and **መመለ** ṭomärä) and 17 'sub-type verbs'. According to the *Qəne* house of Gonğ, the number of both the 'main verb types' and the 'sub-type verbs' totals fourteen, and they are: **ቀተለ** qätälä, **ቍደለ** qäddäsä, **ገበረለ** gäbrä, **በሁለ** bəhlä, **ሳብከሐ** säbbəḥä, **በረከለ** baräkä, **ማተረከለ** maṛräkä, **ተንበለ** tänbälä, **አለ ደላ** 'elä, **ለለየ** leläyä, **ከከለ** kəhlä, **የደረሰ** 'odä, **መመለ** ṭomärä, **ዶዕስ** ḥassä and **ገዢዢ** ḫasäśä (pp. 64–95).

The author indicates the following criteria for Ge'ez verb classification:

- initial, medial, and final consonants
- number of consonants
- presence and absence of laryngeals and semi-vowels
- assimilation and gemination (p. 29)

Thus, none of the classifications of the three *Qəne* houses corresponds to the classifications of August Dillmann (1823–1894), who introduced four ‘main verb types’ and of Kidanä-Wäld Kœfle (1869–1944), who proposed seven ‘main verb types’. (pp. 29, 51–52)

The disagreement of the schools with regard to verb classification is not limited only to the number of ‘main verb types’ and ‘sub-type verbs’. The model verbs chosen in the classifications are not always the same. The author lists all data very carefully, but does not enrich the discussion with an overall conclusion or general summary in which the various classifications are considered or his own approach to them is assessed. However, his further discussions and related examples lead the reader to suppose that the verbs **ቀተለ** qätälä, **ቁጻለ** qäddäsä, **በራከ** baräkä, **ማብረከ** mäbräkä, **ተንበለ** tänbalä, **ሰሰያ** sesäyä, **ከከለ** kəhlä and **መመረ** tomäärä are considered by the majority of the scholars to be the ‘main verb types’ (pp. 51, 153–154).

Apart from the major classifications that we have seen above, the author introduces in the same part of the text two minor classifications of verbs based on semantic and pattern criterions (pp. 33–34, 36–37).

In the next two chapters, the author focuses on the conjugations of verbs; one more classification of verbs is again discussed in this part to illustrate conjugation. According to the theory applied in the book, the verbs are classified into three groups for conjugation. The verb groups are labelled as follows: ‘verbs with semi-vowels’ (**ወ** wä and **የ** yä), ‘verbs with laryngeals’ (**ሀ** ha, **ሐ** h, **ኋ** b, **ኋ** a and **ወ** ḥa) and ‘verbs without laryngeals and semi-vowels’ (p. 101).

The many tasks in the chapters illustrate the conjugations of the verbs chosen by the author to represent each group. In addition, some particular verbs such as **መከራ** mäkäärä/mäkkäärä, **ሳባክ** säbäkä/säbbäkä, **ካልሐ** källəħa and **ሻልል** šälälä/šällälä that could follow two different conjugational schemes are conjugated in all possible variations (pp. 149–151).

In the last chapter (pp. 165–182), the author summarizes the central points discussed earlier and recapitulates the most significant issues of his research. He ends with an urgent appeal to the reader to study and work on the tradition of the unpublished Gə'əz grammar called *'Aggäbab* in order to gain a deeper knowledge of the language and of its sophisticated structure (p. 164), an issue he repeatedly referred to throughout his work. In the glossary, several ecclesiastical titles and indigenous terms used in the earlier chapters

## Reviews

are listed alphabetically with short explanations. An Appendix completes this valuable and commendable book.

RAINER VOIGT, ed., *Tigre Studies in the 21<sup>st</sup> Century/Tigre-Studien im 21. Jahrhundert*, Studien zum Horn von Afrika, 2 (Köln: Rüdiger Köpfe, 2015). xi, 241 pp. Price: € 48.00. ISBN 978-3-89645-682-3.

At the 3<sup>rd</sup> International Enno Littmann Conference held at the Freie Universität in Berlin on April 1–4, 2009, under the heading ‘Tigre, Aksum and More’, a special panel was devoted to the Təgre language and literature and to Təgre society.<sup>1</sup> The present volume, carefully edited by Rainer Voigt, who was also the organizer of the conference, contains the papers presented on this panel in which scholars from Eritrea also actively participated. It is doubtless to their presence that we owe a refreshing first in Ethiopian and Eritrean studies, namely: abstracts of the articles also in Təgre. This language is described by the editor in the Introduction as the third largest Ethiopic-Semitic language after Amharic and Təgrəñña;<sup>2</sup> this is true only if we adopt the new trend in Ethiopian studies, and consider what used to be the Gurage dialect cluster with nearly 3,000,000 speakers or more, as a distinct group of several separate languages.<sup>3</sup>

<sup>1</sup> On this conference see: Hatem Elliesie and F. Breyer, ‘Tigre Aksum and More: The III<sup>rd</sup> International Enno Littmann Conference, April 1–4, 2009 in Berlin’, *Aethiopica* online (AETHIOPICA homepage: Conference reports/Conferences 2009). To the revival of interest in Təgre studies may be added—beside two conferences held in Eritrea itself and mentioned by R.M. Voigt in the *Introduction*—a Workshop in Naples held in 2008 at the “Orientale”, the proceedings of which were edited by Gianfrancesco Lusini, *History and Language of the Tigre-Speaking Peoples*, Studi Africanistici – Serie Etiopica, 8 (Napoli: Università degli Studi di Napoli “L’Orientale”); reviewed by Olga Kapeliuk in *Aethiopica*, 14 (2011), 274–278.

<sup>2</sup> Without mentioning the number of speakers probably to avoid confusion since different sources quote quite divergent numbers; thus in D. Morin, ‘Tigre’, in S. Weninger, ed. 2012, *The Semitic Languages*, Handbücher zur Sprach- und Kommunikationswissenschaft, 36 (Berlin–Boston, MA: De Gruyter Mouton, 2012), 1142–1152, here p. 1143, the approximate number indicated from *Ethnologue* for the year 2005 is 800,000 whereas the same *Ethnologue* for the year 2010 quotes the number 1,390,000 (*Ethnologue Online*). In Eritrean sources the number of the speakers of Təgre is indicated as one third of the whole but the total number of population is not supplied.

<sup>3</sup> R. Meyer 2012, ‘Gurage’, in *ibid.* 1220–1257, here pp. 1223–1224. An extreme case of this trend can be found in the Table of the Semitic languages in A. Faber, ‘Genetic Subgrouping of the Semitic Languages’, in R. Hetzron, ed, *The Semitic Languages*
